Fresh, Innovative Solutions at Every Stage of the eDiscovery Lifecycle

Prism's team sees eDiscovery from a different perspective. Our goal is to apply actionable insights at each stage of the eDiscovery lifecycle to defensibly manage and reduce the volume of data, provide key metrics, and assist the case team quickly locate key evidence. **Our unique methods have seen cost reductions of up to 87%.**

The Prism Periscope: A Holistic Set of eDiscovery Services

Prism consultants help clients overcome eDiscovery challenges, ease resource constraints, accomplish strategic initiatives, and achieve superior outcomes. The result is dramatic cost reduction and an accelerated discovery timeline.

We transform:

Chaos → Clarity

Tactical → Strategic

Excessive Discovery → Right-sized Discovery

Our Expert eDiscovery Consultants Work Seamlessly with Your Team

Augment Your Case Team

Our team includes senior eDiscovery consultants and attorneys, data scientists, and IT professionals who bring decades of experience managing and supporting discovery projects. We provide in the trenches support to your team, such as:

- Targeted, matter-specific expertise across the EDRM
- Workflow development for proactive and streamlined processes
- Defensible, vetted approaches to mitigate risk

Best Practices Consulting + Implementation

Prism's advisory services focus on the intersection of a defensible workflow, deployment of best practices, and leveraging technology throughout the entire litigation lifecycle. Documentation, metrics, and informed decisioning are the cornerstone on which our well-established workflows are built. These guide:

- eDiscovery needs assessment and evaluation
- Modern playbook development
- Deployment and workflow training

Expert Advisory Services

We leverage our collective legal and technical expertise to bridge the gap between the strategic and tactical aspects of eDiscovery. We provide:

- eDiscovery liaison services
- Meet and confer negotiations / ESI protocol development
- Discovery strategy and motion practice support
- Expert and 30(b)(6) witness services

The Prism Periscope of Services

Early Case Strategy

The first 100 days of a matter are critical. Getting your house in order quickly helps you evaluate the fact pattern, issue proper legal holds, prepare for the meet and confer, and pinpoint key evidence – all of which lead to cost containment downstream.

Prism consultants leverage innovative workflows to give you the power to:

- Defensibly reduce custodians under hold and eliminate redundant or nonrelevant data sources
- Quickly understand the story the data tells and target relevant content
- Gain intelligence to determine whether to settle or proceed

Search Term Optimization + Data Minimization

Many overlook the art of data minimization and crafting search terms. This can lead to mistakes that may not be realized until it is too late. Using advanced information retrieval theory and standardized workflows, Prism can help optimize search term strategies with our unique narrative analysis approach to improve retrieval rates and increase levels of recall and precision.

Additionally, at each stage of the EDRM, we utilize powerful methods to reduce the volume of data moving downstream to the more expensive phases of eDiscovery.

These innovative methods can defensibly reduce the time needed for review from months to days.

Discovery Scoping + Negotiation

Discovery disputes are increasing exponentially. Having the right experts on your team, sound processes in place, and the most effective metrics are critical to getting the outcome you want.

Prism offers unmatched expertise in discovery scoping and leverages the Evidence Optix® Proportional Discovery Assessment framework to help you:

- Negotiate reasonable and proportional discovery plans
- Evaluate estimated discovery spend
- Provide documentation and metrics to the court to support disputes

Intelligent Data Collection

With the explosion of data volumes and emerging data sources, the “collect everything, filter later” mentality is no longer a viable option. Prism’s approach guides you to the most relevant data faster and with more precision — before collection begins.

We incorporate leading search- and index-in-place technologies to rapidly assess and collect targeted data. Prism deploys innovative solutions to remotely capture most data sources quickly, with minimal employee disruption.

The battle against data volumes doesn’t end at production — our workflows include critical disposition plans so you aren’t saddled with unnecessary data in future cases.

Modern eDiscovery Playbook

A consistent and organized process across matters ensures better outcomes and helps protect against errors, data loss, and sanctions. Our consultants keep up-to-date on innovative technologies and develop modern playbooks and workflows that are practical, improve efficiencies, and align with your particular needs. Prism can help you:

- Create defensible workflows across all stages of the EDRM
- Establish consistent and efficient processes for outside counsel
- Develop a strategic process for early case strategy and meet and confer negotiations

Review Strategy + Management

Document review is the longest and costliest component of the discovery process. Prism experts can optimize and speed review time using machine learning, data mining, and statistical sampling. We are well-versed in a variety of applications that focus attorney review on highly relevant content. Our consulting team provides training, management, and productivity monitoring throughout the process.

Prism works seamlessly with your case team and can provide oversight of service providers and managed review teams. We take this task off your plate so you can concentrate on the merits of the case.
